One of the first thing that I normally do after installing Windows is to disable the automatic Windows Update.

1. [install manual transfer switch](#)
2. [install manually python package](#)
3. [install manual boost controller](#)

I tried to install one by one but still no luck At first I wanted to reset the Windows Update components using the official Microsoft Fix it 50202 tool but after thinking for a while, this error code 66A should have nothing to do with a broken Windows Update since other updates were able to install except for..
